Education

B.E. – Computer Science Engineering

Government College of Engineering, Erode
2023 – Present | CGPA: 8.14/10.00

Diploma – Computer Science Engineering

Muthayammal Polytechnic College, Namakkal
2020 – 2023 | 96%

Technical Skills

Frontend

HTML, CSS, JavaScript, React (Basic)

Backend

Java, Servlets, Spring Boot

Database

MySQL, PostgreSQL

Deployment

AWS EC2, Vercel

Achievements

Tech Competitions

Participated in many hackathons and paper presentations

Academic Excellence

Secured 96% in Diploma, CSE

Project Development

Built multiple full-stack & AI/ML projects

Soft Skills

Problem Solving, Debugging, Team Collaboration, Analytical Thinking

Certifications

Web Scraping with Python – IBM
Full Stack Web Development using Amazon EC2 – IBM
Full Stack Certification – Infrix

Hobbies

Listening to Pocket FM, Podcasting, Reading Books

Objective

Software Developer with practical experience in Java, Spring Boot, and database-driven applications, seeking to leverage strong backend development and problem-solving skills to deliver scalable, efficient software solutions in a full-time engineering role.

Internship

The Context Lab

Mar. 2026

End-User Tester Intern

- Tested agent workflows on a multi-agent orchestration and AI evaluation platform.
- Identified and defined bugs to the developer team, ensuring accurate and reliable evaluation results.

Projects

KAI – AI Voice Assistant Agent

2026

AI/ML Project

GCE, Erode

- Architected a multi-agent LLM system where multiple local models independently process sub-tasks, consolidated by a final agent into a single optimized response.
- Built a voice-controlled system automation layer with custom tools for OS-level control, enabling hands-free developer workflows.

BroCodex – AI Code Correction & Optimization Pipeline

2026

AI Project

GCE, Erode

- Built a multi-agent-to-single-agent pipeline that autonomously detects, corrects, and optimizes code across a codebase.
- Implemented a selector agent to evaluate and merge outputs from multiple agents into one production-ready codebase.

VendX – AI Price Analysis

2026

Web Scraping / Data Analytics / AI Project

GCE, Erode

- Built a Python-based web scraping pipeline to extract product data, pricing, and stock availability across e-commerce sites.
- Analyzed pricing data to identify best-selling price bands and generate business-facing product insight reports.

T&P – Aptitude Training & Proctored Test Platform

2026

Python / Systems Project

GCE, Erode

- Built a Python-based training platform for aptitude and programming tests with real-time automated proctoring, including tab-switch/focus-change detection.
- Added VM detection to auto-submit tests and flag cheating attempts, alerting admins with student ID and reason.

Connect Application

2025

Web Application

GCE, Erode

- Connected students and alumni for referrals, mentorship, and career guidance, monitored by admin users.
- Implemented secure role-based authentication across student, alumni, and admin roles.
